## Scan results

- Scoring
- CSP analysis
- Cookies
- Raw server headers
- Scan history
- Benchmark comparison

Test

Content Security Policy (CSP)

Score

-20

Reason

Content Security Policy (CSP) implemented unsafely. This includes 'unsafe-inline' or data: inside script-src , overly broad sources such as https: inside object-src or script-src , or not restricting the sources for object-src or script-src .

Advice

Remove unsafe-inline and data: from script-src , overly broad sources from object-src and script-src , and ensure object-src and script-src are set.

Test

Cookies

Score

-

Reason

No cookies detected

Advice

None

Test

Cross Origin Resource Sharing (CORS)

Score

0

**Reason** Content is not visible via cross-origin resource sharing (CORS) files or headers.

**Advice** None

**Test** Redirection

**Score** 0 

**Reason** Initial redirection is to HTTPS on same host, final destination is HTTPS

**Advice** None

**Test** Referrer Policy

**Score** -

**Reason** `Referrer-Policy` header not implemented.

**Advice** Set to `strict-origin-when-cross-origin` at a minimum.

**Test** Strict Transport Security (HSTS)

**Score** 0 

**Reason** `Strict-Transport-Security` header set to a minimum of six months (15768000).

**Advice** Consider preloading: this requires adding the `preload` and `includeSubDomains` directives and setting `max-age` to at least ~~31536000~~ (1 year), and submitting your site to <https://hstspreload.org/> .

**Test** Subresource Integrity

**Score** -5 

**Reason** Subresource Integrity (SRI) not implemented, but all external scripts are loaded over HTTPS.

**Advice** Add SRI to external scripts.

**Test** X-Content-Type-Options

**Score** 0 

**Reason** `X-Content-Type-Options` header set to `nosniff` .

**Advice** None

**Test** X-Frame-Options

**Score** 0\* 

**Reason** `X-Frame-Options` (XFO) implemented via the CSP frame-ancestors directive.

**Advice**      None

**Test**          Cross Origin Resource Policy

**Score**        -

**Reason**      Cross Origin Resource Policy (CORP) is not implemented (defaults to **cross-origin** ).

**Advice**      None

\* Normally awards bonus points, however, in this case they are not included in the overall score ([find out why](#)).
